

## Who We Are

EleMech, Inc. is an equipment and process controls integrator that serves the Water and Wastewater industry. OEMs and Consulting Engineers rely on EleMech for products and services that bridge the gap between manufacturers' standard control hardware designs and non-standard project expectations. EleMech's 25 years of experience is key to meeting both OEM and Consulting Engineer objectives.

OEMs save time and money by utilizing EleMech's services to bid, design, and support unique control requirements. Consulting Engineers can count on EleMech to adhere to specification guidelines and deliver a quality product for their clients.

"OEMs save time and money by utilizing EleMech's services to bid, design, and support unique control requirements..."
